

Your first investment starts here

- Start before you have the full capital
- Without traditional collateral
- With the investment verified before credit activates

CAPITAL + KNOWLEDGE + REPAYMENT HISTORY

Not earlier debt. An earlier start.

Product logic

1

Directed credit

Capital goes into a specific investment.

2

Verified position

Credit activates only after proof.

3

Repay + build

Payments increase ownership over time.

Core rule

No verified position, no activated loan.

THE LATAM PROBLEM

Young people are entering adulthood without the tools — or capital — to start building early

Many young people are expected to build wealth after graduation, but reach that moment without the financial tools, starting capital or traditional collateral to begin

NO CAPITAL + NO COLLATERAL + NO PRACTICAL PATH

SeedLend focuses on the missing first step

Recent evidence

45.1%

of 15-year-old students in Brazil performed below the baseline level of financial literacy.

PISA 2022

16.4%

of adults in Colombia answered the basic interest, inflation and diversification questions correctly.

2023 SURVEY

Different tests. Same signal.

The starting point is weak long before a young person applies for a loan or makes a first investment.

EARLY CUSTOMER DISCOVERY

We interviewed 16 university students in La Paz, Bolivia

11/16

Normally spend the money left after necessary expenses

11/16

Did not receive any kind of financial education

10/16

Believed they needed at least \$500 just to start investing

15/16 15 out of 16 people would save half their money instead of spending it.

The intention to build capital exists. What is missing is a simple and accessible way to get started.

THE PRODUCT

Turn future repayment capacity into an investment position today

**THE USER BUILDS THREE ASSETS AT ONCE**

DISTRIBUTION + NETWORK EFFECT

Universities can become both the learning layer and the growth engine

WHY THIS CAN COMPOUND

- Students spend 4–5 years in the same institutions and peer groups.
- Visible milestones create social proof and referrals.
- Course cohorts create recurring acquisition without paid ads first.
- Specialized paid courses can emerge as SeedLend earns trust.
- B2B services for universities create a second revenue path.

WHY CREDITCOIN + ATTESTCOIN

The lender must know the financed position actually exists before the loan becomes active

FROM HACKATHON MVP TO FINTECH

We proved the trust primitive. Now the product can expand around it.

WORKING NOW

- ✓ Creditcoin loan lifecycle on CC3 testnet
- ✓ Sepolia financed-position lock
- ✓ Attestcoin proof-gated activation
- ✓ Replay protection + exact terms matching
- ✓ Verifiable repayment records
- ✓ Paid + ReleaseEligible completion evidence

NEXT PRODUCT LAYERS

- Real investment execution / settlement
- Monthly schedule + grace/default rules
- Progressive ownership mechanics
- Education credentials + university identity
- Underwriting, reserves and recovery
- Multiple investment rails / diversified assets

SeedLend is not about helping young people borrow earlier
It is about helping them start building earlier
